

# PRACTICAL NO- 2

AIM : Creating account, repository and cloning repository in github.

## #1) CREATING ACCOUNT IN GITHUB.

✓ **Step 1** : Type GitHub login in any browser and search it and then click on official github link.

After that Github login page will appear then click on Create an account Option.

A screenshot of the GitHub login page. At the top is the GitHub logo (Octocat). Below it is the text "Sign in to GitHub". There are two input fields: "Username or email address" and "Password". To the right of the password field is a link "Forgot password?". Below the input fields is a green "Sign in" button. At the bottom, there is a link "New to GitHub? Create an account." with a blue arrow pointing from it to a green callout box.

CLICK HERE TO CREATE NEW  
ACCOUNT IN GITHUB

✓ **Step 2 :** Now enter username ,Email id and set password for your account and then click on verify account and solve the captcha ( it will ask three times to solve the given task) and after that click on the create account.

## CREATE YOUR ACCOUNT

Join GitHub

**Username \***

surajyadav705 ✓

**Email address \***

surajyadav77999@gmail.com ✓

**Password \***

.....| ✓

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter. [Learn more.](#)

**Email preferences**

☒ Send me occasional product updates, announcements, and

**Verify your account**

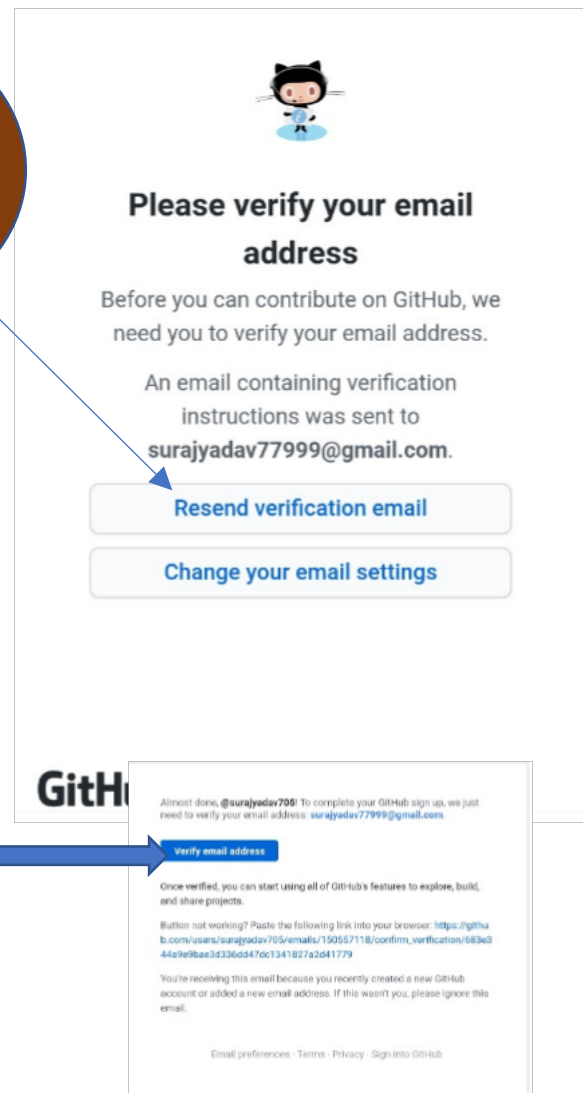

✓

Create account

AFTER ENTERING USERNAME  
PASSWORD AND COMPLETING

Repository name \*

Books|

Books is available. Names are short and memorable.  
Need inspiration? How about **friendly-octo-carnival**?

Description (optional)

**Private**

You choose who can see and commit to this repository.

**Initialize this repository with:**

Skip this step if you're importing an existing repository.

☒ **Add a README file**

This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**

Choose which files not to track from a list of templates. [Learn more.](#)

☐ **Choose a license**

A license tells others what they can and can't do with your code. [Learn more.](#)

This will set **main** as the default branch. Change the default name in your [settings](#).
